7	Modern criminal policy of the Republic of Kazakhstan	6	Criminal law of the Republic of Kazakhstan (General part)	Necessary in further practical activities and in training in magistracy and doctoral studies	<p><b>The purpose of the study:</b> the development of the academic discipline is the formation of students' professional competencies for the implementation of law-making, law enforcement and law enforcement activities in the process of studying the main trends in the development of criminal, criminal procedure and penitentiary legislation.</p> <p><b>Summary:</b> Criminal policy is a multifaceted, complex concept, in which a whole range of features reflecting the contradictory nature of this state-legal phenomenon finds its expression. It can be expressed as a strategy and tactics defined by the state in the field of combating crime.</p> <p><b>Expected results</b></p> <p><b>Know:</b> - the content and significance of criminal law regulation in the structure of criminal policy; factors in the formation of the main directions for the implementation of criminal law, criminal procedure and penitentiary policy; directions for the implementation of criminal law, criminal procedure and penitentiary policy; features of the construction of the norms of modern criminal, criminal procedural and criminal executive legislation.</p> <p><b>Be able to:</b> identify key problems in the development of criminal law; identify key problems in the development of criminal procedure legislation; identify key problems in the development of penitentiary legislation; analyze, interpret and correctly apply modern criminal law norms.</p> <p><b>Possess:</b> the skills of drafting legal acts; – the skills of analyzing the norms of the current criminal, criminal procedural and penitentiary legislation; the skills of generalizing the practice of applying</p> <p><b>Competencies:</b> System - forming</p>

8	Prosecutor's supervision of the Republic of Kazakhstan	5	Criminal law of the Republic of Kazakhstan (General part)	Undergraduate practice	<p><b>The purpose of the study:</b> is the formation of knowledge of the norms of prosecutorial supervision in the Republic of Kazakhstan, necessary in the professional activities of a lawyer. The academic discipline "Prosecutor's Supervision of the Republic of Kazakhstan" is one of the most important legal disciplines, the study of which is necessary, since this course examines the organization, activities and powers of the prosecutor's office of the Republic of Kazakhstan.</p> <p><b>Brief content:</b> the activities of the prosecutor's office to oversee the observance of the Constitution and the implementation of laws relate to almost all areas of public relations that are regulated by the rule of law.</p> <p><b>Expected Result.</b></p> <p><b>To know:</b> - to know the subject and sources of the discipline "Prosecutor's supervision by the RK enactment of the law"; - to know modern problems of the legislation of the Republic of Kazakhstan;</p> <p><b>Be able to:</b> - apply their knowledge in practice; - navigate the system of regulatory legal acts of the Republic of Kazakhstan that regulate this industry;</p> <p><b>Possess:</b> Basic skills in the course of solving situational issues and tasks, to put the acquired knowledge into practice.</p> <p><b>Competencies:</b> System - forming</p>
8	Fundamentals of operational-search activity	5	Criminal law of the Republic of Kazakhstan (General part)	Undergraduate practice	<p><b>The purpose of the study:</b> "Fundamentals of operational-search activity" is to acquire knowledge on the use of scientifically based methods and techniques for the production of general and special operational-search activities aimed at forming students' sound scientific judgments and views on tactical methods of production, processing and consolidation obtained quickly -search data, as well as the transformation of operational information as evidence in criminal cases</p> <p><b>Summary:</b></p> <p>Fundamentals of operational-search activity as a legal scientific discipline is aimed at protecting the rights, freedoms and legitimate interests of citizens and their property, protecting society and the state from criminal encroachment. To ensure that the operational-search activities are carried out by the operational-search activities to expose persons who have committed an unlawful criminally punishable act, they interact with the investigating authorities, the prosecutor's office in order to disclose, investigate and suppress a criminal offense.</p> <p><b>Expected Result:</b></p> <p><b>Know:</b> General and private methods of the course "Fundamentals of operational-investigative activities", have a clear understanding of the conceptual apparatus of individual elements of the operational-search activity, systems and structures, as well as the mechanisms for conducting operational-search activities and the use of operationally significant information as evidence in criminal cases.</p> <p><b>Be able to:</b> Analyze and systematize the collection of operational search data and, on their basis, be able to derive operationally significant information for processing and using these results as evidence in criminal cases, based on theoretical research and practical experience, be able to distinguish between the grounds and conditions for conducting special operational search activities from covert investigative actions.</p> <p><b>Own:</b> Based on the study of the theoretical provisions of the discipline, students must master special techniques and methods for critical analysis of the production of operational-search activities in criminal cases. On the basis of theoretical data, they could logically correctly build the conduct of operational-search activities that contribute to the establishment of objective truth in criminal cases, and also owned the techniques and methods for the production of general and special operational-search activities</p> <p><b>Competencies:</b> System - forming</p>

9	Criminal Executive Law of the Republic of Kazakhstan	5	Criminal law of the Republic of Kazakhstan (General part)	Industrial practice (III)	<p><b>The purpose of the study:</b> to study the main provisions of the criminal policy of the Republic of Kazakhstan</p> <p><b>Summary:</b> The main provisions of the criminal policy of the Republic of Kazakhstan related to the execution of criminal penalties.</p> <p><b>Expected Result:</b></p> <p><b>Know</b> the subject and sources of the discipline "Criminal Executive Law of the Republic of Kazakhstan";</p> <p>- to know modern problems of the legislation of the Republic of Kazakhstan;</p> <p><b>Be able to:</b></p> <p>- apply their knowledge in practice; - navigate the system of regulatory legal acts of the Republic of Kazakhstan that regulate this industry;</p> <p>The main forms of classes in the study of this course are lectures, seminars and practical classes (trainings, situation analysis, solving practical problems, etc.) As a rule, lectures are held on the main topics of the course. The choice of seminars and practical classes may vary depending on the degree of preparedness of the trainees and the specific educational objectives of the educational institution. At the end of the course, students take an exam.</p> <p><b>Own:</b> The main skills in the course of solving situational issues and tasks are to put the acquired knowledge into practice.</p> <p><b>Competencies:</b> System - forming</p>
9	Enforcement proceedings	5	Civil law of the Republic of Kazakhstan (general part)	Industrial practice (III)	<p><b>The purpose of the study:</b> study of the execution of court decisions, methods of execution, bodies executing court decisions.</p> <p><b>Summary:</b></p> <p>Enforcement proceedings are the final final stage of the civil process. The activities of the court and participants in the process aimed at resolving a civil dispute, without the completion of this activity, the execution of the issued judicial act, including the decision, does not make sense. The execution of court decisions ends the process of protecting the right. The issuance of an act by the court does not yet mean the actual restoration of the violated or contested right and the legitimate interest of citizens. The right of a person confirmed by a judicial act and the obligation of another in relation to him is subject to subsequent execution in the order of applying coercive measures against the debtor</p> <p><b>Expected Result:</b></p> <p><b>Know:</b></p> <p>in the field of enforcement proceedings, actions aimed at enforcement</p> <p><b>Be able to:</b></p> <p>to carry out executive actions, draw up protocols for the inventory and seizure of property</p> <p><b>Own:</b></p> <p>Apply the laws "On Enforcement Proceedings", "On Bailiffs" and other legal acts regulating relations in the field of enforcement of the requirements of executive documents; participate in the development of legal acts in accordance with the profile of their professional activities; carry out professional activities on the basis of a developed sense of justice, legal thinking and legal culture; ensure compliance with the law by subjects of law; make decisions and, within their powers, take legal actions in accordance with the law; apply legal acts, implement the norms of substantive and procedural law in professional activities; legally correctly qualify legal facts and circumstances; detect and stop offenses; carry out the prevention of offenses, identify and eliminate the causes and conditions that contribute to their commission; identify, evaluate corrupt behavior; possesses the skills of preparing legal documents in the field of public administration; ready to perform official duties to ensure law and order, security of the individual, society, state; is ready to take part in the legal examination of draft legal acts, including in order to identify provisions in them that contribute to the creation of conditions for the manifestation of corruption.</p> <p><b>Competencies:</b> System - forming</p>

10	Basics of qualification of offenses	5	Criminal law of the Republic of Kazakhstan (General part)	Industrial practice (III)	<p><b>The purpose of the study:</b> Forms students' theoretical knowledge and the acquisition of strong skills and abilities necessary for them to effectively perform the tasks assigned to the judiciary and law enforcement agencies, through the application of criminal law in law enforcement and practice.</p> <p><b>Summary:</b> The basics of qualification of crimes is one of the major disciplines studied in higher educational institutions of the Republic of Kazakhstan. Teaching the basics of qualification of crimes involves the creation of a foundation for law enforcement activities for students, as future specialists in the field of Criminal Law and the Criminal Procedure of the Republic of Kazakhstan, in the interaction of law enforcement agencies on the territory and outside the Republic of Kazakhstan, mastering the basic methods of scientific analysis in the qualification of crimes, improving the quality of the investigation of criminal cases at all stages of the criminal process, including in court when considering a criminal case.</p> <p><b>Know:</b> systematized presentation by students of theoretical knowledge about the principles, categories and provisions of the science of criminal law as the basis for the theory of qualification of crimes, teaching students the correct orientation in the current criminal legislation, developing the ability to skillfully interpret and apply the norms of criminal law, qualify crimes.</p> <p><b>Be able to:</b> educating students of a respectful attitude to the criminal law as an unshakable means of protecting citizens, their rights, freedoms and legitimate interests, as well as the interests of society and the state from criminal encroachments. An important aspect of teaching the course of the basics of qualification of crimes is the active development of inter-subject relations with general theoretical and especially with other legal and special disciplines.</p> <p><b>Own:</b> study of problems arising in modern criminal law and criminal procedure, in the course of the formation and construction of a legal state of relations in the Republic of Kazakhstan. The relevance of this problem is due to such factors as a decrease in the quality of the investigation and the quality of qualification of crimes, the study of factors aimed at improving the quality of the investigation, the observance and provision of equal rights to all participants in the criminal process. The state of society, the assessment of the activities of law enforcement agencies and, as a result, the authority of law enforcement as a guarantor of the rights and freedoms of a person, citizen and society, depends on how correctly the criminal law norm is applied. All this puts forward the problem of scientific study and practical application in life.</p> <p><b>Competencies:</b> System - forming</p>

15	Production of overt and covert investigative actions	4	Criminal procedure law of the Republic of Kazakhstan (general part)	Final examination	<p><b>The purpose of the study:</b> the discipline is to consolidate the general theoretical provisions that reveal the features and legal grounds and conditions for the production of overt and covert investigative actions, as well as an in-depth study of the legal nature of overt and covert investigative actions.</p> <p><b>Summary:</b> This course provides for the study of the legal foundations, essence and content of investigative actions (public and covert), determining the features of the criminal procedural procedure for conducting overt and covert investigative actions at the stage of pre-trial investigation and using the obtained factual data as evidence in criminal cases.</p> <p><b>Know:</b> The legal nature, types, grounds, conditions and procedure for the production of public and covert investigative actions in criminal cases, the main differences between covert investigative actions and special operational-search measures.</p> <p><b>Be able to:</b> Correctly determine the legal form and procedure for the production of investigative actions (overt and covert). Depending on the investigative situation, be able to correctly determine the type of investigative action that contributes to the disclosure and investigation of a criminal offense. Professionally competently carry out the algorithm of procedural actions establishing the procedure for the production of covert investigative actions in compliance with the constitutional rights and interests of persons involved in the sphere of criminal procedural legal relations.</p> <p><b>Own:</b> On the basis of theoretical knowledge, possess practical skills for the production of overt and covert procedural actions that contribute to the establishment of objective truth in a criminal case. Develop skills in studying and analyzing information obtained during the production of investigative actions and using this information as evidence in criminal cases. Professionally correctly fill out procedural documents related to the production of overt and covert investigative actions.</p> <p><b>Competencies:</b> System - forming</p>
<b>PROFILING DISCIPLINES</b>					
<b>Selectable Components (CV)</b>					
1	Forensic technology	3	Theory of Government	Criminalistics	<p><b>The purpose of the study:</b> students acquire knowledge about the implementation of criminal procedural activities in the pre-trial</p>

			and Rights		<p>investigation of a criminal case and the application of scientific and specialized knowledge for the production of investigative and covert investigative actions</p> <p><b>Summary:</b> the features of the application and use of special scientific knowledge in criminal cases are revealed, through the appointment and production of forensic examinations, consultations, etc. The obtained results of consultations or the conclusion of a forensic examination are attached to the materials of the criminal case and used in the subject of proof.</p> <p><b>Expected result:</b> They know the basic forensic technical means and methods in the pre-trial investigation of criminal offenses used to secure trace information.</p> <p><b>To be able to:</b> implement the obtained scientific and technical forensic knowledge, skills in the course of the production of a criminal case.</p> <p><b>Own:</b> forensic techniques and scientific and practical experience in identifying, fixing and initial research of trace information in criminal, civil and administrative cases. Including prepare materials, documents and items for forensic research in forensic science and forensic laboratories</p> <p><b>Competencies: special</b></p>
1	Fundamentals of forensic methodology	3	Theory of Government and Rights	Criminalistics	<p><b>The purpose of the study:</b> students acquire knowledge about the implementation of criminal procedural activities in the pre-trial investigation of a criminal case and the application of scientific and specialized knowledge for the production of investigative and covert investigative actions</p> <p><b>Summary:</b> the features of the application and use of special scientific knowledge in criminal cases are revealed, through the appointment and production of forensic examinations, consultations, etc. The obtained results of consultations or the conclusion of a forensic examination are attached to the materials of the criminal case and used in the subject of proof.</p> <p><b>Expected result:</b> They know the basic forensic technical means and methods in the pre-trial investigation of criminal offenses used to secure trace information.</p> <p><b>To be able to:</b> implement the obtained scientific and technical forensic knowledge, skills in the course of the production of a criminal case.</p> <p><b>Own:</b> forensic techniques and scientific and practical experience in identifying, fixing and initial research of trace information in criminal, civil and administrative cases. Including prepare materials, documents and items for forensic research in forensic science and forensic laboratories</p> <p><b>Competencies: special</b></p>
2	Interaction of the investigator with the bodies of inquiry	5	Criminal procedure law of the Republic of Kazakhstan (general part)	Necessary for further practical activities and for training in magistracy and doctoral studies	<p><b>The purpose of the study:</b> is to study the theoretical and practical foundations of the interaction of the investigator with the bodies of inquiry, the acquisition of skills that allow one to navigate in professional activities on the organizational and legal aspects of the interaction of the investigator with the bodies of inquiry at all stages of the pre-trial investigation.</p> <p><b>Summary:</b> This course is aimed at studying the theoretical and legal issues of the interaction of the investigator with the bodies of inquiry in the process of disclosure, investigation, as well as issues of prevention of criminal offenses. The discipline considers topical problematic issues of the activities of the bodies of inquiry in the pre-trial investigation in criminal cases, where the preliminary investigation is mandatory and optional. In the Study Process, the forms of inquiry, the jurisdiction of criminal cases to the bodies of inquiry, as well as the place and role of the bodies of inquiry in the system of pre-trial investigation are revealed.</p> <p><b>Know:</b> Organizational and legal issues of the activities of the bodies of inquiry at the stage of pre-trial investigation, procedural forms of conducting criminal proceedings by the bodies of inquiry, features of the interaction of the investigator with the bodies of inquiry in the process of investigating grave and especially grave crimes, as well as the activities of the bodies of inquiry in cases in which preliminary investigation not necessary.</p> <p><b>Be able to:</b> Correctly and competently draw up procedural documents establishing the procedure for the interaction of the investigator with the bodies of inquiry. It is logically correct to build the structure of individual instructions and instructions from the investigator to the bodies of inquiry in the process of their interaction during the investigation of a criminal case.</p> <p><b>Possess:</b> Practical skills that allow designing and setting tasks by investigative units before the bodies of inquiry in the process of their</p>

					interaction during the investigation of a criminal case. To acquire practical experience that allows the investigator to carry out a critical analysis of information and other information provided to the bodies of inquiry in the process of interaction of the latter with the investigative units. <b>Competencies:</b> Special
2	Digitalization of pre-trial investigation	5	Criminal procedure law of the Republic of Kazakhstan (general part)	Necessary in further practical activities and in training in magistracy and doctoral studies	<b>The purpose of the study:</b> the course is to consolidate the fundamental foundations of conducting criminal proceedings and, on their basis, to consolidate the theoretical, legal and practical issues of conducting an electronic pre-trial investigation. <b>Summary:</b> This course is aimed at studying and researching the criminal procedural foundations of conducting criminal proceedings. The format of the investigation of a criminal case in accordance with the criminal procedure legislation allows conducting criminal proceedings in electronic format. The content of the discipline is inextricably linked with the state policy in the field of digitalization of all public relations, contains the evolution of the transition of pre-trial investigation to an electronic format. <b>Know:</b> Criminal procedure, grounds and conditions for conducting criminal proceedings in electronic format. Normative-legal acts regulating the activities of criminal prosecution bodies in conducting electronic pre-trial investigation. <b>Be able to:</b> Conduct a comprehensive analysis of problematic issues and the prospects for digitalization of pre-trial investigation and, on their basis, using scientific and technical means, procedurally correctly conduct criminal proceedings in electronic format. <b>Own:</b> Practical skills that allow you to master the techniques and methods of conducting criminal proceedings in electronic format, as well as master the workflow of electronic pre-trial investigation and, on their basis, conduct a comparative analysis of the electronic format of the investigation of a criminal case with the classical production of a criminal case. <b>Competencies:</b> Special
3	Theory of forensic evidence	5	Criminal procedure law of the Republic of Kazakhstan (general part)	Necessary in further practical activities and in training in magistracy and doctoral studies	<b>The purpose of the study:</b> A specialized academic discipline that reveals the procedure for researching and collecting evidence in a criminal case. <b>Short content:</b> Train students; to instill in them the skills and abilities to correctly interpret and apply the norms of criminal procedure and civil procedure law <b>Expected Result:</b> <b>Know:</b> the basis, procedure and implementation of judicial evidence in administrative, civil and criminal cases, the basis for the production of forensic examination and apply the knowledge gained during the trial. <b>Be able to:</b> apply the results of the examination in the course of the process. <b>Possess:</b> skills of implementation and use of judicial evidence in legal practice. <b>Competencies:</b> special
3	Methodology for applying special knowledge	5	Criminal procedure law of the Republic of Kazakhstan (general part)	Necessary in further practical activities and in training in magistracy and doctoral studies	<b>The purpose of the study:</b> to provide students with knowledge about the implementation of procedural activities in the investigation of a criminal case and the application of special knowledge gained in the study of disciplines of criminal law. <b>Summary:</b> reveal the features of the application and use of special scientific knowledge in criminal cases, through the appointment and production of forensic examinations, consultations, etc. Upon receipt of the results of consultations or the conclusion of a forensic examination, they are further attached to the materials of the criminal case and used in the subject of proof. <b>Expected Result:</b> <b>Know:</b> The main forensic tools and methods in the investigation of crimes, as well as cases of concluding a procedural agreement. <b>Be able to:</b> implement the acquired forensic knowledge, skills and abilities in legal practice. <b>Own:</b> research activities, skills in collecting and preparing scientific, forensic materials, processing the results of legal examination of documents and experimental research in forensic and forensic laboratories <b>Competencies:</b> special

4	Criminalistics	5	Criminal procedure law of the Republic of Kazakhstan (general part)	Industrial practice (III)	<p><b>The purpose of the discipline</b> is to give the student the methodological recommendations necessary for the student in his practical activities related to the investigation of crimes.</p> <p><b>Summary:</b> Legislation regulating the powers of participants in criminal proceedings; departmental, interdepartmental and other legal acts regulating the activities of the preliminary investigation bodies; investigative and judicial practice of investigating various types of criminal offenses.</p> <p><b>Expected result: know:</b></p> <ul style="list-style-type: none"> <li>- methods and means of preliminary verification of statements about criminal offenses;</li> <li>- justify and make procedural and tactical decisions;</li> <li>- organize the work of the investigative-operational group that inspects the scene of the incident, including during the performance of other investigative and covert investigative actions;</li> <li>- apply technical and forensic methods and means of detecting, fixing and seizing trace information and traces of crimes;</li> </ul> <p><b>Be able to:</b></p> <ul style="list-style-type: none"> <li>- use the help of citizens, the media in the pre-trial investigation of crimes;</li> <li>- analyze and evaluate search (secret) and evidentiary information on unsolved criminal cases;</li> <li>- draw up criminal procedure documents in accordance with the requirements of the criminal procedure legislation and the recommendations of forensic science.</li> </ul> <p><b>Possess:</b> Basic skills in the course of solving situational issues and tasks, to implement the acquired knowledge in the legal practice of pre-trial investigation bodies.</p> <p><b>Competencies:</b> special</p>
4	Technical and forensic expertise	5	Criminal Procedure Law of the Republic of Kazakhstan (General Part)	Industrial practice (III)	<p><b>The purpose of the study:</b> is to study the theoretical and applied foundations of technical and forensic examination as a type of forensic examination. To acquaint students with the concept, subject, objects, tasks and methods of technical and forensic examination; to form an understanding of special knowledge in the field of technical and forensic examination; to develop the skills of independent production of technical and forensic examination of documents, the preparation and execution of an expert opinion.</p> <p><b>Summary:</b> theoretical foundations and prospects for the development of technical and forensic expertise. Methods of technical and forensic examination. Modern possibilities of technical and forensic research of details and materials of documents. The study of documents made with the help of character printers.</p> <p><b>Expected Result.</b></p> <p><b>Know:</b> - the methodology of forensic examination, the theory of forensic diagnostics and identification in relation to technical and forensic examination; scientific foundations of technical and forensic examination; classification, manufacturing technology and the main properties of documents - material evidence, traditional objects of technical and forensic examination; - material evidence; modern possibilities of scientific methods and technical means, which are equipped with forensic expert institutions, and the rules for their application in solving the problems of technical and forensic examination; modern possibilities of technical and forensic examination; technical means and techniques for fixing, illustrating and researching evidence; methods of production of technical and forensic examination;</p> <p><b>To be able to:</b> use modern expert technologies in solving diagnostic and identification problems of technical and forensic examination; apply the means and methods of forensic photography to solve problems of fixing the appearance; solve typical expert tasks in the study of typical objects of technical and forensic examination; be able to correctly and efficiently draw up an expert opinion based on the results of a technical forensic examination of documents and make illustrations for this conclusion; interact with employees of operational, investigative bodies and courts in preparing materials for a technical and forensic examination, evaluating and using the results of these examinations;</p> <p><b>Own:</b> the conceptual apparatus of technical and forensic examination and the professional vocabulary of a forensic expert; the rules for conducting forensic records of documents and the use of relevant reference and information and information retrieval systems for forensic purposes.</p> <p><b>Competencies:</b> Special</p>

5	Interaction between the prosecutor and the investigator in the process of investigating grave and especially grave types of crimes	3	Criminal Procedure Law of the Republic of Kazakhstan (General Part)	Necessary in further practical activities and in training in magistracy and doctoral studies	<p><b>The purpose of the study:</b> It is necessary to determine the optimization of the activities of government agencies and officials performing the function of criminal prosecution. The named goal meets the needs of the prosecutor's implementation of the functions of criminal prosecution and supervision.</p> <p><b>Summary</b> The implementation of criminal prosecution as a procedural activity has a multi-subject character. Due to the peculiarities of the legal regulation of the powers of participants in criminal proceedings who carry out criminal prosecution, it becomes necessary to determine the points of intersection of their joint activities. The nature of such joint activity can be defined as interaction.</p> <p><b>Know:</b> - the system of law enforcement and judicial bodies, their place in the state apparatus and competence;</p> <p><b>Be able to:</b> - analyze the norms of the Constitution of the Republic of Kazakhstan, laws, by-laws regulating the organization and functioning of the interaction between the prosecutor and the investigator in the process of investigating grave and especially grave types of crimes and give them a legal interpretation;</p> <p><b>Own:</b> - legal terminology, skills of working with legal acts; - the skills of analyzing various legal phenomena, legal facts, legal norms and legal relations that are objects of professional activity; - analysis of law enforcement and law enforcement practice; - resolution of legal problems and conflicts;</p> <p><b>Competencies:</b> Special</p>
5	Procedural agreement in criminal proceedings	3	Criminal Procedure Law of the Republic of Kazakhstan (General Part)	Necessary in further practical activities and in training in magistracy and doctoral studies	<p><b>The purpose of the study:</b> is to study the theoretical and practical problems of the institution of a procedural agreement on the recognition of guilt and an agreement on cooperation in the investigation of a criminal case. On the basis of a study of obtaining reliable and sufficient knowledge by students, which allows them to navigate the procedure for drawing up a procedural agreement "plea bargain" and "consent to cooperation" of the suspect (accused) by the investigator, prosecutor.</p> <p><b>Summary:</b> The study of the course is aimed at studying the legal nature of the procedural agreement in the criminal process of the Republic of Kazakhstan. In the course of learning the essence, the issues of the procedural agreement are considered as a type of a separate institution of criminal justice, which allows optimizing pre-trial and judicial proceedings. The study of the course provides for the identification of the procedural agreement with other related types of the institution of the criminal process.</p> <p><b>Know:</b> The legal nature of the procedural agreement from the standpoint of theory and practice, experience and prospects for the development of the institution of a deal with justice based on international experience, as well as the legal grounds and conditions for the implementation of a procedural agreement in the criminal proceedings of the Republic of Kazakhstan.</p> <p><b>Be able to:</b> Correctly build and draw up a procedural agreement based on the criminal procedure legislation of the Republic of Kazakhstan, as well as be able to determine the algorithm of actions of the criminal prosecution authorities and the court at the stages of pre-trial and trial proceedings.</p> <p><b>Possess:</b> Practical skills and techniques that allow analyzing the actions of authorized bodies and officials constituting a procedural agreement, master the skills of drawing up a procedural agreement and give a legal opinion on the legality and validity of drawing up a procedural agreement.</p> <p><b>Competencies:</b> Special</p>
6	Fundamentals of Forensic Medicine	5	Criminal procedure law of the Republic of Kazakhstan (general part)	Final certification	<p><b>The purpose of the study:</b> teaching forensic medicine and psychiatry is to determine the basic range of theoretical and practical knowledge</p> <p><b>Summary:</b> The course "Fundamentals of Forensic Medicine" is represented by two disciplines in the field of forensic medicine and forensic psychiatry.</p> <p><b>Expected Result:</b> <b>Know:</b> the basis, procedure and implementation of judicial evidence in administrative, civil and criminal cases, the grounds for the production of forensic examination and apply the knowledge gained during the trial. <b>Be able to:</b> apply the results of the examination in the course of the process. <b>Possess:</b> skills of implementation and use of judicial evidence in legal</p>

					practice. <b>Competencies:</b> Special
6	Fundamentals of Forensic Psychiatry	5	Criminal procedure law of the Republic of Kazakhstan (general part)	Final certification	<p><b>Purpose of the study:</b> Formation of students' holistic understanding of the methodology of expert research in forensic psychiatry, the main methods used by forensic psychiatric experts in the production of all types of forensic psychiatric examinations, the admissibility of using these methods in the professional activities of a forensic psychiatric expert, means and techniques, used in expert practice.</p> <p><b>Summary:</b></p> <ul style="list-style-type: none"> <li>– study of the methodological foundations of forensic psychiatric expert activities, the main methods of collecting and examining evidence in the production of forensic psychiatric examinations;</li> <li>– study of modern expert technologies used in forensic activities;</li> <li>– acquisition of practical skills in assessing and using the results of a forensic psychiatric expert opinion.</li> </ul> <p><b>Know:</b> the concept, subject, tasks and methodology of forensic psychiatry, the organizational and legal foundations of forensic psychiatry, the main legislative documents governing the appointment and production of forensic psychiatric examination, the forms of participation of a forensic psychiatrist in the work of forensic investigative bodies and the limits of his competence in conducting forensic -psychiatric examination</p> <p><b>To be able to:</b> draw up the text of a resolution (determination) on the appointment of a forensic psychiatric examination or a reasoned referral to conduct a psychiatric examination, substantiate and correctly raise questions about the decision of a forensic psychiatric examination of the accused, witness, victim and person serving a sentence, draw up a court ruling to conduct a forensic psychiatric examination in relation to persons participating in criminal and civil proceedings</p> <p><b>Possess:</b> the skills of drafting the text of a motivated application for a psychiatric examination, the basic skills of a forensic psychiatric assessment of the nature and degree of danger of persons with mental disorders, the skills of formulating appropriate and correct questions to an expert psychiatrist in various legal situations.</p> <p><b>Competencies:</b> Special</p>
