CATALOGUE OF THE ELECTIVE COURSES
6B04118 «FINANCE»
Year of entrance -2020

Semey, 2020 year

Student memo

Dear student of the Kazakh legal, humanitarian and innovative university, we offer you a catalog of elective disciplines. This is a systematic list of all elective academic disciplines with a brief description of them. It is designed for you, to provide the opportunity for prompt, convenient and comprehensive formation of an individual learning path. This is an assistant to create your individual curriculum. According to the credit technology of training, all academic disciplines are divided into three cycles: compulsory disciplines (OOD), basic disciplines (DB) and core disciplines (PD). The disciplines in each of these cycles are divided into two types: Mandatory component and Optional component (elective disciplines).

The disciplines of the compulsory component are determined by the State Compulsory Education Standard for each specialty and are mandatory for all students without exception.

Elective component disciplines are offered by your department. From the entire list of Elective courses you can choose the most interesting for you. Thus, for each of the cycles of academic disciplines, your curriculum consists of two groups of disciplines: a compulsory component and a component of choice (elective courses).

The methodology for choosing elective courses using the Catalog to include them in your individual curriculum is as follows:

1. Find your course and study term in the list.
2. Determine the number of credits for this elective discipline from a standard curriculum
3. Carefully read the list of offered elective courses. Pay attention to the combination of academic disciplines in accordance with the selected courses through special codes. Only one discipline can be selected from a group of elective courses.
4. Read a brief description of the elective courses that interest you and make your choice.
5. Check if the total number of credits for the courses you have chosen matches the required amount of credits according to the Model Curriculum.
6. Use the help of an adviser when choosing elective disciplines

Awarded academic degree: Bachelor's degree in Business and Management in the educational program 6B04118 «Finance»

5	Financial control and audit	5	Automation of accountancy, State budget	Application of knowledge in the performance of diploma works and	<p>The purpose of studying the discipline: to give students system knowledge of theoretical, methodological and organizational bases of financial control and audit in financial and budgetary organizations, to study the main problems and</p>

				further training in the master's degree	<p>to give possible variants of improvement of financial control, and also to open tendencies of development, reserves and ways of successful implementation of economic policy, effective use of budgetary, target, credit and other money.</p> <p>Content: The discipline studies the meaning, types and forms of financial control, legislative and regulatory acts regulating the activity of control, revision and audit, organization of control (audit), examination and analysis of financial statements of financial and budgetary organizations.</p> <p>Learning Outcome:</p> <p>Know: legislation in the field of state financial control; competence of financial control bodies; stages and specifics of audit; difference between audit and audit;</p> <p>To be able to: plan and program of audit in the public sector; to use the terminology of the auditor and auditor.</p> <p>Skills: the organization and carrying out audit in financial and budgetary organizations; drawing up the act of audit.</p> <p>Competencies: Special.</p>
5	Audit and Control	5	Automation of accounting, Planning and budgeting system	Application of knowledge in the performance of diploma works and further training in the master's degree	<p>The purpose of studying the discipline: the aim is to give students a systematic knowledge of the theoretical, methodological and organizational foundations of financial control in financial and budgetary organizations.</p> <p>Content: The discipline "Audit and Control" studies the basics of control and audit, goals, objectives, types of control and audit, methods and techniques of their implementation, methods and techniques of conducting and documenting control and audit activities, audit and control over the formation of financial results of activities and capital of the enterprise, assessment of the state of accounting and reliability of reporting of the enterprise.</p> <p>Learning Outcome:</p> <p>Know: legislation in the field of state financial control; competence of financial control bodies; stages and specifics of audit.</p> <p>To be able to: plan and program of audit in the public sector; to use the terminology of the auditor and auditor.</p> <p>Skills: the organization and carrying out audit in financial and budgetary organizations; drawing up the act of audit.</p>

					Competencies: Special.
6	Management of public and private property	5	Basics of management and marketing	Financial mechanisms for public-private partnerships	<p>The purpose of studying the discipline: formation of a scientifically grounded idea about the formation, development and current state of the management system of state and municipal property; mastering the specifics and objectives of the state and municipal property management bodies, the main indicators and criteria of its effectiveness, the relationship with real economic and social processes.</p> <p>Content: The discipline "Management of public and private property" studies the theoretical foundations of public property management at different levels, the peculiarities of sectoral specifics of management, methods of analysis of the efficiency of public property management, principles of planning the main performance indicators of public institutions and enterprises, which are managed by public property objects.</p> <p>Learning Outcome:</p> <p>Know: the essence, content and principles of management of the property complex of organizations and enterprises; elements of organizational structures for strategic management of the property complex.</p> <p>To be able to: to understand the formation of state policy in relation to property in accordance with the goals and objectives; to monitor the effectiveness of the use of state and municipal property.</p> <p>Skills: analysis of the use of property and the ability to manage the resources of the territories; the use of financial instruments to fill local budgets.</p> <p>Competencies: Special.</p>
6	Financial resources management	5	Financial planning and forecasting	Administration of investment projects and decisions, Evaluating the effectiveness of investment decisions	<p>The purpose of studying the discipline: To reveal essential bases of interaction of the theory and practice of management, necessity of management of financial resources, the maintenance of its traditional and special functions, a role and value of this management in modern conditions.</p> <p>Content: "Financial resources management" studies the specifics of financial resources management; the system of public financial resources; management of public financial resources; management of cash and</p>

					<p>circulating assets of enterprises; methods of evaluation of capital financial assets; methods of financial resources management.</p> <p>Learning Outcome:</p> <p>Know: theory and practice of financial resources management in modern conditions; features of financial resources systems of various economic entities; methods of cash flow analysis and cash flow forecasting; fundamentals of financial calculations;</p> <p>To be able to: forecast cash flows; manage cash; оценивать evaluate the effectiveness of financial resources; analyze the probability of bankruptcy; make an analytical assessment of possible financial difficulties; apply methods of accounting and control of receivables.</p> <p>Skills: financial calculations, analysis of financial resources, development of methods of effective management of financial resources.</p> <p>Competencies: Special.</p>
7	<p>Financial mechanisms for public-private partnerships</p>	4	<p>Management of public and private property</p>	<p>Application of knowledge in the performance of diploma works and further training in the master's degree</p>	<p>The purpose of studying the discipline: formation of a clear idea of the possibilities of public-private partnership and standard solutions in this area. Special emphasis is placed on the mechanisms of management and regulation in the field of public-private partnership.</p> <p>Content: The discipline "Financial mechanisms of public-private partnership" studies the importance and role of public-private partnership in the financial system, principles, risks, and models of public-private partnership, the importance of public-private partnership in the innovation sphere, other forms of public-private partnership financing.</p> <p>Learning Outcome:</p> <p>Know: the essence and legal, technical, financial features of various contracts of public-private partnership; to have knowledge of regularities and features of the mechanism of project financing; modern legislation, methodological, regulatory and other legal documents regulating the activities of private investors in cooperation with public authorities.</p> <p>To be able to: to structure ways and sources of financing of budgetary investment projects within the investment plan; to</p>

					<p>estimate financial position of Corporation, to make strategic, current and operational financial plans, and forecasts; to estimate economic, financial efficiency of the investment project.</p> <p>Skills: application of the method of analysis of benefits and costs during the economic examination of the concession proposal; have the skills to make optimal financial decisions in a market economy in various schemes of financing public-private partnership.</p> <p>Competencies: Special.</p>
7	Leasing and leasing operations	4	Banking, Financial management	Evaluating the effectiveness of investment decisions	<p>The purpose of studying the discipline: Formation of University graduates knowledge that contribute to the formation of skills and abilities in the development of the mechanism of leasing transactions, methods of calculation and justification of lease payments, methods of analysis of the effectiveness of leasing projects, assessment of the benefits of leasing and minimize emerging financial risks.</p> <p>Content: The discipline "Leasing and leasing operations" studies the place and role of leasing in the system of sources of financing of fixed assets of the enterprise; normative regulation of leasing; process of pricing of leasing and schemes of leasing payments; insurance of leasing operations; analysis of advantages and disadvantages of leasing and other sources of investment of the enterprise.</p> <p>Learning Outcome:</p> <p>Know: the basic concepts used in leasing operations; methods for determining lease payments; the process of forming an investment project and methods for assessing the effectiveness of investment leasing projects and the degree of risk associated with their implementation;</p> <p>To be able to: calculate lease payments using various methods; assess the effectiveness of leasing compared to other types of financing; analyze the possible risks of leasing activities.</p> <p>Skills: to perform calculations of leasing payments; to form the leasing contract, to create leasing companies; to develop leasing investment projects; to carry out procedures of selection and an assessment</p>

					<p>of the offered investment leasing projects-to be guided in the regulatory documents regulating activity on leasing.</p> <p>Competencies: Special.</p>
8	Administration of investment projects and decisions	3	Valuation of assets and business	Application of knowledge in the performance of diploma works and further training in the master's degree	<p>The purpose of studying the discipline: Acquisition of basic knowledge and formation of basic skills in mathematical representation and analysis of the effectiveness of the investment project, as well as the choice of the best project among the alternatives.</p> <p>Content: This discipline studies the importance of the investment project, the main stages of administration of the investment activity of the enterprise, planning and development of the project, making management decisions on the project implementation, control of the project implementation, evaluation and analysis of the achieved results after the completion of the project.</p> <p>Learning Outcome:</p> <p>Know: the basic concepts used in leasing operations; methods for determining lease payments; the process of forming an investment project and methods for assessing the effectiveness of investment leasing projects and the degree of risk associated with their implementation;</p> <p>To be able to: calculate lease payments using various methods; assess the effectiveness of leasing compared to other types of financing; analyze the possible risks of leasing activities.</p> <p>Skills: to perform calculations of leasing payments; to form the leasing contract, to create leasing companies; to develop leasing investment projects; to carry out procedures of selection and an assessment of the offered investment leasing projects-to be guided in the regulatory documents regulating activity on leasing.</p> <p>Competencies: Special.</p>
8	Evaluating the effectiveness of investment decisions	3	Business valuation, Leasing and leasing operations	Application of knowledge in the performance of diploma works and further	<p>The purpose of studying the discipline: When studying the discipline, students must learn to make management decisions on their own to address the selection of investment proposals, the formation of investment projects and programs, planning sources of financing and management of</p>

				<p>training in the master's degree</p>	<p>investment projects.</p> <p>Content: This discipline studies the subject, the content of evaluation of investment decisions, its goals and objectives, cash flows and outflows of investment project, evaluation of investment efficiency and project justification, selection of investment projects with a limited budget, financial analysis of investment projects, analysis of financial and economic risks, indicators of commercial, budgetary and economic efficiency.</p> <p>Learning Outcome:</p> <p>Know: Know the methodology of organization of collection, processing, analysis and systematization of statistical, scientific, legal and other information on innovative development of economic systems. Know the basic methods and means of solving problems in the framework of the study, taking into account its functional area and focus. Know the principles, methodology and procedure for the formation of reports, reviews, publications on the results of research.</p> <p>To be able to: Be able to choose methods and means of solving problems adequate to the objectives of the study. To be able to structure reports, reviews, publications, to determine the logic of their presentation, to issue in accordance with accepted norms and standards. Apply modern mathematical tools to solve substantive economic problems in the innovation sector of the economy.</p> <p>Skills: Have experience in conducting research in the subject area. To possess skills of formation of reports, reviews, publications on results of the carried-out researches.</p> <p>Competencies: Special.</p>

LIST OF DISCIPLINES
components of choice for educational program
6B04118 «FINANCE»

Full-time course of study – 4 year

Year of entrance -2020

Name of the discipline	Code of discipline	Number of credits	Semester
GENERAL EDUCATIONAL DISCIPLINES			
<i>Elective course 1</i>			2
Module of economic and legal knowledge		5	
Fundamentals of market economy and	FMEE 1111	3	

entrepreneurship			
Fundamentals of law and anti-corruption culture	FLACC 1112	2	
Elective course 2			
Module of economic and legal knowledge		5	
Fundamentals of market economy and entrepreneurship	FMEE 1111	3	2
Basics of life safety and ecology	BLSE 1112	2	
BASIC DISCIPLINES			
Elective course 1			
Statistics	Sta 2211	5	3
Socio-economic statistics	SES 2211	5	
Elective course 2			
Basics of management and marketing	BMM 2212	5	3
Market infrastructure	MI 2212	5	
Elective course 3			
Basics of economic analysis	BEA 2213	4	4
Functional cost analysis	FCA 2213	4	
Elective course 4			
Finance	Fin 2214	4	4
Global financial markets	GFM 2214	4	
Elective course 5			
Financing and lending of the investment	FLI 3215	5	5
Investment activities of companies	IAC 3215	5	
Elective course 6			
Professional values and ethics of a financier	PVEF 3216	5	5
Ethics of business communication	EBC 3216	5	
Elective course 7			
Taxes and taxation	TT 3217	5	5
Tax planning	TP 3217	5	
Elective course 8			
Automation of accountancy	AA 3218	6	6
Computer technologies in accounting	CTA 3218	6	
Elective course 9			
Fiscal policy	FP 3219	6	6
Tax management	TM 3219	6	
Elective course 10			
Planning and budgeting system	PBS 3220	5	6
Internal production planning and budgeting	IPPB 3220	5	
Elective course 11			
Consulting and related services	CRS 4221	5	7
Financial consulting	FC 4221	5	
Elective course 12			
Bankruptcy and reorganisation of organisations	BRO 4222	5	7
Mergers and restructuring of the company	MRC 4222	5	
Elective course 13			
Analysis of financial and economic activities	AFEA 4223	5	7

Financial analysis	FA 4223	5	
Elective course 14			
Valuation of assets and business	VAB 4224	5	7
Business valuation	BV 4224	5	
Elective course 15			
Monitoring, audit and control of procurement of goods, works and services	MACPGWS 4225	4	8
Budgetary control	BC 4225	4	
PROFILING DISCIPLINES			
Elective course 1			
Financial markets and intermediaries	FMI 2306	5	4
Financial markets and financial institutions	FMFI 2306	5	
Elective course 2			
Banking	Ban 3307	5	5
Bank management	BM 3307	5	
Elective course 3			
Insurance	Ins 3308	6	6
Financial risk management	FRM 3308	6	
Elective course 4			
State budget	SB 3309	5	6
Financial planning and forecasting	FPF 3309	5	
Elective course 5			
Financial control and audit	FCA 4310	5	7
Audit and Control	AC 4310	5	
Elective course 6			
Management of public and private property	MPPP 4311	5	7
Financial resources management	FRM 4311	5	
Elective course 7			
Financial mechanisms for public-private partnerships	FMPPP 4312	4	8
Leasing and leasing operations	LLO 4312	4	
Elective course 8			
Administration of investment projects and decisions	AIPD 4313	3	8
Evaluating the effectiveness of investment decisions	EEID 4313	3
