					<p>specific features; about composition; about the simplest elements of imagery in language; educate literary and artistic taste, the ability to understand and feel the mood of the work.</p> <p><b>Skills:</b> demonstrate communication skills necessary to familiarize preschool children with fiction.</p> <p><b>Competencies:</b> Special competence:</p>
2	Development of speech of children of preschool age	5	Children's literature for preschool children	Correctional pedagogy	<p><b>The purpose of the study:</b> to form a set of theoretical knowledge about the means and methods of mastering the technique of speech, practical skills and abilities that develop professional qualities of speech:</p> <p><b>Summary of the course:</b> This discipline considers the features of the formation of speech skills, the introduction of a child to the world of culture, universal values, methods of speech development (verbal, visual, game) and the features of their application in classes with children of early and preschool age.</p> <p><b>Expected results:</b></p> <p><b>To know:</b> scientific foundations of the methodology of children's speech development; the role of the native language and speech in the development of the child; the main methodological techniques of speech</p>

				<p>development and native language teaching in the history of foreign and domestic pedagogy; current modern ideas about the ontogenesis of speech and the main areas of research of children's speech; rules and features of vocabulary, grammar, phonetics, coherent speech of preschoolers; criteria assessment of the level of speech development of children of different age groups; the basics of continuity of work on the development of spoken language and native language teaching in kindergarten and elementary school; modern trends in the development of preschool education, educational programs aimed at educating the speech language of children.</p> <p>Be able to: study and determine the features of children's mastery of their native language, analyze the features of speech development; create a developing speech environment and conditions for children's practical development of vocabulary, phonetics, grammatical structure of their native language, coherent speech; implementation of activities for the selection and use of didactic material;</p>
--	--	--	--	---

					<p>execution of works on speech development, lesson plans, games, scenarios, etc. with preschool children. development;</p> <p>conducting expertise on speech development programs; conducting experimental work in the field of children's speech development; providing work on children's speech development with methodological equipment; professional development of educators in the field of children's speech development, assistance in the development of innovative pedagogical technologies.</p> <p>Skills: communication with children, parents, teachers; establishing an emotional connection with preschool children; creating an atmosphere of cooperation with children; organizing work to improve conversational culture; applying theoretical knowledge in the practice of preschool institutions and general education institutions.</p> <p><b>Competencies:</b> Special competence:</p>
2	Workshop on	5	Methods of familiarization with the fiction of preschool children	Features of working with the family and counseling parents of children with special educational needs	<p><b>The purpose of the study:</b> to improve the skills of fluency in voice, to develop skills that form the professional qualities of speech of future educators..</p> <p>Summary of the course: This discipline aims to</p>

	<p>expressive reading</p>			<p>provide students with theoretical knowledge on the problems of educator activity in the field of expressive reading as an art, on the technique of speech, on the means of speech expressiveness, and also equips them with practical skills of analysis and expressive performance of works of various literary genres.</p> <p><b>Summary of the course:</b>  This discipline is aimed at obtaining students' theoretical knowledge on the problems of the teacher's activity in the field of expressive reading as an art, on the technique of speech, on the means of speech expressiveness, and also equips them with practical skills of analysis and expressive performance of works of various literary genres.</p> <p><b>Expected results:</b>  To know: the basic principles of expressive reading; types of theater used in preschool institutions; analysis of literary text; basic requirements for performance analysis, its characteristic features and differences from literary analysis, the main criteria for evaluating the expressive performance of literary works, techniques for improving speech techniques using a set</p>
--	---------------------------	--	--	--

					<p>of special exercises, the main methods and techniques used in teaching preschoolers performing analysis and expressive reading of texts of various genres. Be able to: expressively read literary works of various genres; analyze literary texts as works of art, perform their performing analysis, objectively and reasonably evaluate their own expressive reading of texts and reading of classmates; select and correctly perform exercises on speech techniques; – organize independent work that contributes to the assimilation of the content of the discipline being studied.</p> <p>Skills: expressive reading skills; fundamentals of performance and leadership work with children; the ability to analyze their activities in order to improve their activities and improve their skills.</p> <p><b>Competencies:</b> Special competence:</p>
3	Physical education and health-improving technologies in preschool institutions	5	Theory and methodology of educational work	Production practice	<p><b>The purpose of the study:</b> to form students' scientific worldview and understanding of the theoretical foundations of physical education and child development Summary of the course: This discipline is aimed at physical development and strengthening the health of the child: the development of</p>

				<p>physical qualities, motor activity and the formation of physical culture of preschoolers, education habits of daily physical activity through the use of recreational technologies in preschool.</p> <p><b>Summary of the course:</b> This discipline is aimed at the physical development and strengthening of the child's health: the development of physical qualities, motor activity and the formation of physical culture of preschoolers, education of the habit of daily physical activity through the use of wellness technologies in preschool institutions.</p> <p><b>. Expected results:</b> <b>To know:</b> features of the organization of work on physical education of preschool children and advanced health-saving technologies in a preschool educational institution. Be able to: diagnose the levels of psychophysical and sensorimotor development of children, implement ways of physical education and health protection of preschool children; form practical skills aimed at diagnosing and evaluating the effectiveness of the</p>
--	--	--	--	--

					<p>process of physical education in preschool.</p> <p><b>Skills:</b> physical education of preschool children through wellness technologies in preschool and in everyday life, planning physical education lessons.</p> <p><b>Competencies:</b> Special competence:</p>
3	Theory and methodology of physical education of children	5	Theory and methodology of educational work	Production practice	<p><b>The purpose of the study:</b> to carry out professional training of students in the field of physical education of preschool children.</p> <p><b>Summary of the course:</b> This discipline equips students with theoretical knowledge in the field of physical culture, its role in the formation of the foundations of a healthy lifestyle in children, through the use of physical culture and interactive games, exercises and classes, as well as in the organization of all types of children's activities through physical minutes, didactic games with elements of movement, outdoor games.</p> <p><b>Expected results:</b></p> <p><b>To know:</b> theoretical foundations in the field of physical education of preschool children, its role in the formation of the foundations of a healthy lifestyle in children, through effective methods of techniques and forms of organization of the educational process.</p>

					<p>Be able to: introduce forms and methods of organizing physical education of preschool children in the educational process of preschool education; carry out consulting activities on the organization and conduct of individual and collective physical culture and sports activities of persons of different ages.</p> <p>Skills: strengthening the health of preschoolers, improvement of the health-saving culture, organization of comprehensive control in physical culture and sports training.</p> <p><b>Competence:</b> Special competence:</p>
4	Fundamentals of Natural Science and methods of familiarizing children with nature	5	Preschool pedagogy	Production practice	<p><b>The purpose of the study:</b> to study the current state and negative factors of the environment, bioecology, the biosphere and humanity.</p> <p><b>Summary of the course:</b> This discipline equips students with knowledge in the field of perspiration techniques aimed at forming preschool children's ideas about objects and phenomena of living and inanimate nature, introduces them to the world of plants and animals, promotes a humane attitude to the surrounding nature, the formation of skills to work with natural materials.</p>

					<p><b>Expected results:</b></p> <p><b>Know:</b> objects and phenomena of living and inanimate nature, features of the formation of preschool children's ideas about the environment and methods of familiarization with the nature of children of different age groups of preschool education institutions; ways of organizing various forms of familiarization of preschool children with nature and their environmental education.</p> <p>Be able to: apply modern teaching methods and technologies in teaching and natural science in preschool institutions; organize the process of familiarization with nature for preschool children - create conditions for familiarization with nature and environmental education.</p> <p>Skills: to possess the skills of classification of effective methods and techniques of teaching natural science in the DOW, as well as working with natural materials.</p> <p><b>Competencies:</b> Special competence:</p>
4	Actual Problems of environmental protection	5	Preschool pedagogy	Production practice	<p><b>The purpose of the study:</b> formation of students' knowledge of the principles and rules of environmental protection and rational</p>

				<p>use of its resources, as well as environmental awareness</p> <p><b>Summary of the course:</b> This discipline is aimed at forming a system of knowledge about nature and educating a conscious attitude to it in preschool children, equips them with a system of environmental knowledge, allows them to gain practical experience, teaches them to learn about the world of nature and try their hand at preserving and multiplying it.</p> <p><b>Expected results:</b></p> <p><b>Know:</b> theoretical foundations of environmental protection, the main anthropogenic-caused negative processes in various environmental objects (hydrosphere, atmosphere and soil) and in ecosystems; principles and methods of protection of flora and fauna, conservation of their biodiversity and productivity; global environmental problems of our time, prospects for their development and solutions.</p> <p>Be able to: use the acquired knowledge for environmental protection and rational use of natural resources; predict and evaluate possible negative consequences of human activities for the environment.</p>
--	--	--	--	--

					<p>Skills: formation of a positive attitude to the environment, competent participation in the discussion and solution of modern environmental problems generated by new technologies in the context of global industrialization and urbanization of the planet.</p> <p><b>Competencies:</b> Special competence:</p>
5	Development of children's visual art	5	Preschool pedagogy	Production practice	<p><b>The purpose of the study:</b> - to prepare students for the development, preparation and conduct of classes in visual activities within the framework of various educational programs..</p> <p><b>Summary of the course</b> This discipline examines the features of the development of visual creativity in preschool children; the role and importance of visual art in the system of artistic and aesthetic education of preschool children; forms students' skills to independently design the process of ethetic education and training of visual activities of preschoolers.</p> <p><b>Expected results:</b>  <b>to know:</b> methods and means of developing fine arts in children, methods of conducting classes in fine arts and other forms of organization of artistic and aesthetic education of children.  Be able to: use visual</p>

					<p>activity as a means of aesthetic education and artistic education of preschoolers, independently choose methods, forms and means of teaching for a specific lesson, activation of creative abilities of children.</p> <p>Skills: the use of expressive means characteristic of each field of fine art.</p> <p><b>Competencies:</b> Special competence:</p>
5	Workshop on visual activity	5	Preschool pedagogy	Production practice	<p><b>The purpose of the study</b> is to prepare students for creative pedagogical activity, mastering knowledge, practical skills and necessary skills for teaching and educating preschool children in the field of artistic and aesthetic education, taking into account their age characteristics.</p> <p><b>Summary of the course:</b> This course is aimed at training preschool specialists who are able to professionally carry out artistic and aesthetic education of preschoolers, forming their skills to use expressive visual means in drawing, painting, thematic composition and decorative work.</p> <p><b>Expected results:</b></p> <p><b>know:</b> theoretical foundations of fine art; terminology and means of artistic expression used in the process of visual activity; features of the development of</p>

					<p>visual creativity in preschool children; the role and significance of fine art lessons in the system of aesthetic education of preschoolers.</p> <p>Be able to: apply expressive visual means in drawing, painting, thematic composition and decorative work, make thematic plans for the course of visual creativity in preschool.</p> <p>Skills: organization of practical visual activities with preschool children</p> <p><b>Competencies:</b> Special competence:</p>
6	Theory and methodology of musical education of preschool children	6	Fundamentals of teaching skills	Production practice	<p><b>The purpose of the study:</b> the formation of musical pedagogical knowledge, skills and abilities, the development of the artistic aspects of the student's personality through acquaintance with the basics of musical art</p> <p><b>Summary of the course:</b> This discipline is aimed at solving the main tasks of musical education of preschool children, reveals the methods and techniques of musical education as a way of interrelated activity of the teacher and children, aimed at developing musical abilities, forming the foundations of musical culture of preschool children.</p> <p><b>Expected results:</b></p> <p><b>To know:</b> theoretical foundations of the management of musical</p>

					<p>activity, methods and techniques of musical education of preschoolers, methodological foundations of the organization and conduct of matinees, theatrical events.</p> <p>Be able to: stimulate independent musical and musical entertainment activities taking into account the individual characteristics of preschool children, organization of children's leisure; analysis of the preparation and conduct of matinees; demonstration of ways to work with different types of theaters with different attributes.</p> <p>Skills: planning and organization of musical and theatrical games; organization of interaction of preschoolers in musical activities; participation in the preparation and conduct of matinees; control over the formation of skills of musical activity, creative activity.</p> <p><b>Competencies:</b> Special competence:</p>
6	Musical art in pre-school education	6	Fundamentals of teaching skills	Production practice	<p><b>The purpose of the study:</b> to familiarize students with the main foreign and domestic theoretical concepts and models of family psychotherapy.</p> <p>formation of musical pedagogical knowledge, skills and abilities, development</p>

				<p>of the artistic aspects of the student's personality through acquaintance with the basics of musical art</p> <p><b>Summary of the course:</b> This discipline is aimed at forming a common culture of children through the development of musicality, musical and artistic activity of children and the ability to emotionally perceive music, introduction to the musical art. It enriches the aesthetic feelings of the child, develops musical thinking, creative imagination and an idea of the beauty of music.</p> <p><b>Expected results:</b></p> <p><b>To know:</b> The theoretical foundations of musical art, the history of music, its features, the influence of representatives of Kazakh art on the development of the cognitive sphere of preschool children.</p> <p>Be able to: introduce preschool children to the art of music through the development of aesthetic, musical thinking.</p> <p>Skills: formation of a high level of moral feelings, the ability to evaluate the phenomena of musical life; identification of musical abilities in a preschool child</p> <p><b>Competencies:</b> Special competence:</p>
